

Southborough Open Land Foundation Presents:

SOLF Wildlife Survey:

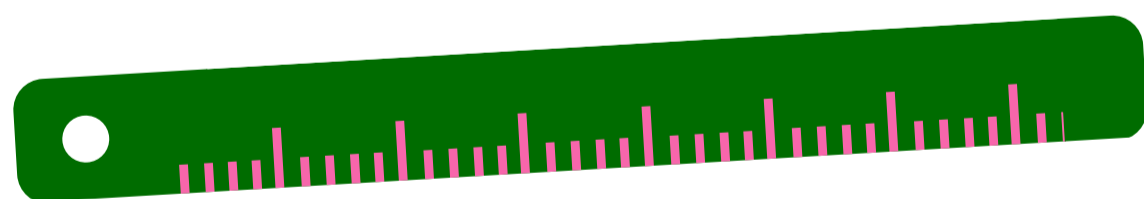

**Using citizen science to learn,
explore and protect open spaces**

**Thursday, May 26 at 7:00 PM
Southborough Library**

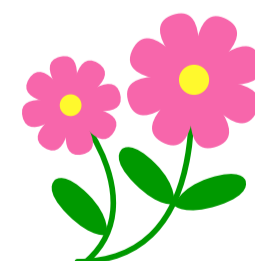

Our presenter Lawrence Spezzano is a project coordinator, scientist, proud teacher and Southborough resident. He has published related research and has presented at several conferences.

Learn about how local volunteers gather data in open land in Southborough and the many ways YOU can help!

Find out which reptiles and amphibians species you should expect to encounter from March to October – most right around the corner!

Discover what you can do in your own backyards to study animals, their activity and promote conservation!

Discuss how citizen science and classroom education intersects, as well as potential opportunities to collect viable, publishable data!
